

BHUPENDRA SINGH

Engineer Manager | Tech Leader

📍 Bengaluru, India | 📞 +91 9971253965 | ✉️ yadavbhupendra25@gmail.com | [LinkedIn](#) | [GitHub](#) | [Website](#)

PROFESSIONAL SUMMARY

Results-driven software engineer with 13+ years of experience building scalable, distributed systems and leading high-impact backend/Android projects across SaaS, e-commerce, and payment domains. Proven expertise in architecting microservices-based platforms, optimizing high-throughput APIs, and solving complex system design challenges. Adept at mentoring teams, driving agile execution, and delivering production-ready solutions with a strong focus on performance, reliability, and maintainability.

- 13+ years of experience in software design and development, delivering scalable and robust solutions with integrated monitoring and alerting, focused on enhancing customer experience.
- 9+ years of experience in technical leadership, system architecture, and peer mentoring.
- 4+ years of experience in managing and leading a high-performing team.
- Hands-on expertise in backend stacks: Java, Spring Boot, Kafka, MySQL, MongoDB, Elasticsearch, Node.js, JUnit5.
- Deep experience with AWS, Docker, Kubernetes, CI/CD pipelines, and monitoring tools.
- A strong advocate of System Design, HLD, LLD, event-driven architectures, domain-driven design, and clean code principles.
- Certified in Software Architecture and Project Management with award-winning contributions in hackathons.

CORE SKILLS

Technical: Java, Spring Boot, Microservices, MySQL, MongoDB, Kafka, Elasticsearch, Architecture design, CI/CD, Cloud (AWS), Observability (Prometheus, Grafana), Distributed systems, SaaS Architecture, Event-Driven Systems, Scalable API Design, Docker, JavaScript, Python, Android

Tools: Git, Jenkins, Kubernetes, Terraform, Performance Monitoring tools(Elastic APM)

EDUCATION: B. Tech | UPTU Lucknow | 2008 – 2012

PROFESSIONAL EXPERIENCE

Senior Engineering Manager / Architect – Ola Electric | Consumer Team | Dec 2023 – April 2026

- **Led** end-to-end **multiple feature** deliveries with **cross-functional teams**, implementing **Canary** and **rolling active-passive deployments** supported by **Prometheus-Grafana-based** monitoring.
- **Led** a high-performing **team of 11** to exceed goals and drive organizational growth, contributing to a **20% increase** in **dealership acquisition**.
- Architected and developed a distributed, microservices-based, event-driven system for **MoveOS 5 features**.
- Re-architected a Kafka & reduced the disk usage by 40% by using **snappy** compression.

- Rearchitured the Flink pipeline by discarding the unnecessary events and saved the disk space 20 Tb per/month.
- Diagnosed and resolved critical production bottlenecks by analyzing issue patterns and addressing underlying technical debt, achieving a **50% reduction** in **production issues**.

Engineering Manager – Gaana | Jan 2023 – Aug 2023

- **Designed and led the development** of Android auto & **payment integrations** using QR code.
- Improved system observability using **Grafana + Prometheus**.

SDE-III – OYO | Oct 2021 – Jan 2023

- **Designed and led the development** of multitheme support for the app used by millions of users.
- Created the custom error monitoring system unified for Android/iOS/Web using prometheus/Grafana & created the alerting system.
- Improved the performance of the system by introducing the redis as a caching layer in BFF.

Senior Software Engineer – Gojek(Skud Labs) | Dec 2019 – Oct 2021

- **Converted Go-Transport** pricing api into bulk estimates, cutting down api count by 50% & improved user experience .
- **AWS** cloud infrastructure setup with **Docker**.
- Set up **CI/CD workflows** using **Docker** and **Bamboo**, integrated with GitLab commits and AWS
- **Blue-Green** deployments for seamless, **zero-downtime** releases.

Senior Software Engineer – Airtel Payments Bank | Jun 2018 – Dec 2019

- Designed and implemented an **Aadhaar OCR processing pipeline**, enabling document upload to cloud storage (S3) and automated identity verification using OCR APIs.
- Built validation logic to **detect data mismatches** in extracted OCR results and trigger appropriate error handling workflows.
- Integrated secure **card generation flow for Airtel Payments system**, implementing encryption using **Triple DES and RSA** for sensitive data protection.
- Collaborated on **Android UI development** for the Aadhaar verification flow, ensuring seamless integration with backend services.

Software Engineer – App Street Software Private Ltd. | Aug 2016 – Jun 2018

- Designed and implemented a **secure media upload pipeline** using pre-signed URLs, enabling efficient and scalable file uploads to cloud storage.

- Integrated **AWS Lambda** for asynchronous media processing, including video transformation and optimization workflows.
- Built video processing pipelines using **FFmpeg** to generate lower-resolution videos for optimized delivery.
- Developed backend services using **Spring MVC**, handling API development and business logic implementation.
- Implemented **data visualization features** by generating charts from database insights using Python libraries.

Software Engineer – Twist Future Software Private Ltd. | April 2013 – Aug 2016

- Designed and developed a **mini web crawler** to extract and parse stock-related news from multiple sources, enabling real-time insights for users.
- Integrated external **stock market APIs** to fetch and display live stock prices with optimized data handling.
- Built scalable **backend APIs for Valefy (car parking system)**, handling booking, availability, and user management workflows.
- Developed and maintained **truck management system APIs**, supporting logistics operations and real-time tracking.
- Engineered a **multiplayer game server (Teen Patti-like application)**, handling concurrent users, game logic, and real-time interactions.

CERTIFICATIONS & AWARDS

Certifications:

- *Java & Business Analysis – Ducat*

Awards:

- *Best Employee (Newcomer) – OYO*
- *Hackathon Winner – App Street Software*
